

Our Journal for research

**Chloroplast endosymbiosis
and the strange case of
*Paulinella chromatophora***
Zaineb Henderson

**The lost art of hot
lacquering**
Penelope Thoyts & Merv
Hobden

**Microscopy of
static and moving
bubbles and leaf
shadows**
H J Swatland

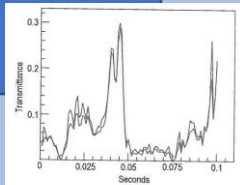

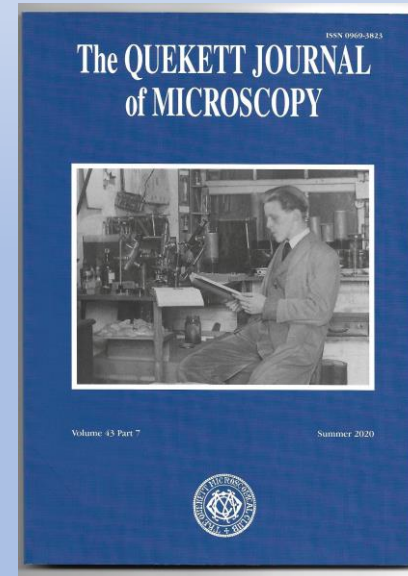

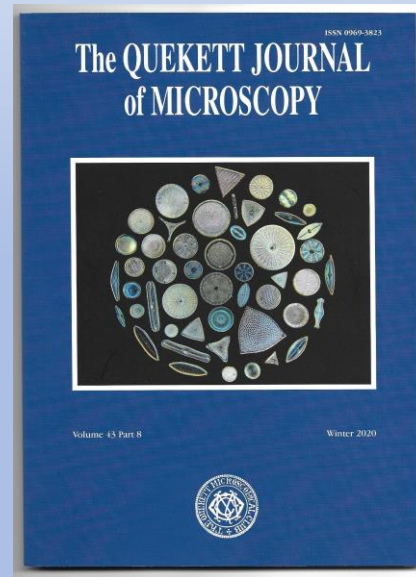

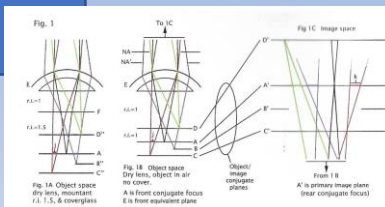

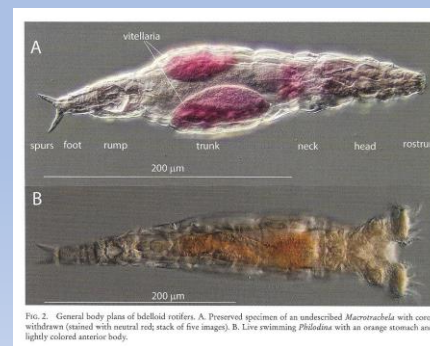

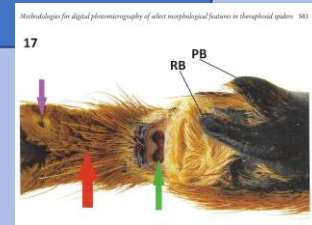

FIG. 6. Both recording channels at 700 nm, responding in the same way to a flicker pattern on the turbulent water surface caused by bubbles and lenses.

**Depth of field in
microscopy**
John Ward

**Methodologies for digital
photomicrography of
select morphological
features in theraphosid
spiders**
Danniella Sherwood &
Ray Gabriel

**Taxonomical
characterisation of
bdelloid rotifers in
the family
Philodinidae**
Aydin Örstan

**Arthur Earland
and his slides**
Chris Green

The Quekett Journal of Microscopy

Published twice a year in full colour with no submission costs to authors.

Studies on microscopic life and biological, geological and materials structures

Peer-reviewed papers on subjects relating to the light microscope

Microscope technique and DIY apparatus and modifications

Submission of articles is open to all – not just members.

Digital photomicrography, techniques and equipment

The archive of the club journal from 1868 is available to members. Papers include reports of many important optical developments.

The Journal, in its previous guises as the Journal of the Quekett Microscopical Club (1868–1966) and Microscopy (1966–1993), has been published in an unbroken run since 1868, making it one of the longest running microscope journals worldwide.

History of the light microscope

Study of historical mounts and techniques
